

TEXSPRAY T-MAX[™] Electric Airless & Air-Assisted Texture Sprayers

VERSATILITY

From spray plasters up to aggregates, T-MAX delivers

MODULARITY TO ITS FULLEST

Designed for optimized transport to and from as well as on the jobsite

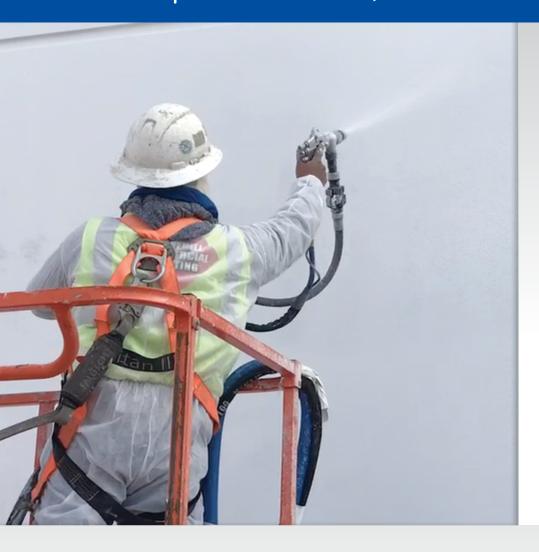

EASY ACCESS PUMP

No-Tools pump design allows for easy pump access and cleaning

Texture Applications

T-MAX™506 - T-MAX™657 - T-MAX™6912

T-MAX Electric Texture Sprayers Airless or Air-Assisted, T-MAX delivers!

The easiest way to spray texture

Graco's TEXSPRAY T-MAX electric texture sprayers provides you efficiency and performance needed for plaster or texture jobsites whilst improving flexibility and versatility whenever you need it.

A modular design tuned for 1-person handling and supported by a multitude of hose solutions and applicators, T-Max will be able to provide you with all the tools needed for a professional finish.

Sprays the Widest Range of Texture Materials

*Separate air compressor required. Requires minimum 20 SCFM air compressor.

TIP!

When pumping extremely coarse materials, heavier aggregates have a tendency to build up on the interior surface of a hose. This can limit both the flow and dispersion of the material. When spraying these materials, it may be worth considering pre-lubricating your machine's pump and hose. This reduces friction and enables the aggregates to slide more smoothly across the hose.

Modularity

Graco's finest in modular designs

Modularity from your doorstep to a multitude of simultaneous jobsites, up and down floors, all the way to the heart of the pump on the jobsite.

Graco's brand new T-MAX provides you with an unseen modular and versatile design without any need for tools.

Job Site Logistics

Relocating your unit or moving up and down floors has never been easier. Simply disconnect your pump from your material hopper and move them individually.

Hoses and Applicators

- Flexible hose sets available in various lengths with quick connecting CamLock™
- Choose between Inline Lance for Airless application, or STX and Pole applicators for Air-Assisted

Split Pump-Hopper Design

- 1. Loosen pump locking pin
- 2. Open hopper clamp
- 3. Slide pump away from hopper

2" CAM Foot Valve for 2" connection to container

Wether you have a Graco T-MAX hopper or an external material container, the modularity of T-MAX offers you connectivity to various systems.

Quick-Access Piston Pump

T-MAX pumps are designed to be taken apart in seconds, allowing access to any part of the pump. Most importantly, no tools are required!

- Cleaning of pump
- Replacement of inlet ball
- Removal of piston spring for aggregate spraying on T-MAX 6912

TexSpray T-Max 506 & 657

The First Choice for Interior Plasters and Decorative Materials

TEXSPRAY T-MAX[™] 506 and TEXSPRAY T-MAX 657 have been specifically designed to apply most interior plasters and fillers.

Using the T-MAX 506 or 657 in combination with an external compressor and an air-assisted applicator allows you to spray decorative plasters with aggregates up to 1mm.

Small, Compact, and Maneuverable

- Balanced design for easy rolling even when full
- · Locking front swivel caster wheel

Material Hoppers

- 65 or 95 litre hoppers
- Steep-sided design keeps material flowing
- Option to install Graco's Vibra-Flo system
- · Option to install Graco's Bagrollers

Heavy-Duty Modular Frame

- Steel construction withstands jobsite abuse
- Easy, no-tools connect and disconnect
- Small, compact and balanced design for easy maneuvering

Tool Box

- Built-In Storage compartment
- · Keep your nozzles, tips and other tools safe

Material Scraper

Straight and curved edge allowing hopper cleaning as well as emptying material bucket fully

TexSpray T-Max 6912

One Machine for nearly every Texture Application

TEXSPRAY T-MAX 6912, the newest, easiest way to spray smooth and aggregate materials on exterior and interior texture jobs. From textured acrylics, synthetic stucco, EIFS, acoustics, joint compound and more.

Easily apply spray plasters without a compressor or switch to air-assisted mode to spray decorative finishes and heavy aggregates up to 2 mm.

SmartControl™ 3.0

- · Delivers smooth, consistent material flow
- Provides Airless or flow mode
- LED display shows pressure, litres, and more

Flow / Pressure Control

TEXSPRAY T-MAX 6912 comes with a 3-position switch allowing you to choose between Airless, Air-Assist with Shut-Off and a Cleaning position.

- **UP** = Pressure Control for Airless
- MIDDLE = Flow Control for Air-Assist with external signal cable control
- DOWN = Flow Control without external signal cable, ideal for priming and cleaning

Choose Flow Control for Aggregate Holding Materials
Pump keeps working to maintain set rpm of motor.
If rpm is achieved, it will keep pumping at this rpm.

Choose Pressure Control for Airless Plasters

Pump keeps working to maintain set pressure. If pressure is achieved, pump will stop working untill pressure drops (spray is initiated)

Oversized Passages for Maximum Productivity

- Optimized pump design for smooth flow of material
- Oversized piston cage for flow of material and aggregate, even allowing easy no-tool spring removal

230V MaxPower™ DC Motor

- Use with standard 16/20 Amp circuits
- No-maintenance, brushless design
- Heavy Duty Drivetrain

Air Hose and Signal Cable Management

Built-In Air Manifold with EURO air couplers provides fixed air connection to frame relieving strain on signal cable when pulling on air line.

TexSpray T-Max Applicators

The Applicator that best fits your needs

Your applicator is as important as your pump, if not even more. Choose the applicator that best fits your needs. Within the segments of Airless or Air-Assist, Graco offers a variety of applicators.

STX Gun

Sequence texture gun for less pack-outs

Starts and stops the pump for you – all you need to do is operate the trigger.

- Provides soft-start operation that eliminate material bursts
- Built-in sensor detects tripper being pulled or released
- Built-in detent allows flow of material and air even when pump is shut-off
- Closes completely when detent is operated

T-MAX Lance

Inline $^{\text{\tiny{M}}}$ design applicator with spool valve to open and close. Can be used for Airless as well as Air-Assisted applications.

Inline Gun

Combines the benefits of a normal spray gun with inline material flow. For Airless applications only.

FreeFlo™ Inline Gun

Inline design applicator without valve. Ideal for larger aggregates thanks to its large passage. Can be used for Airless as well, ideally with an external ball-valve.

Rigid and Flexhead Pole Guns

Supported by a large variety of spray discs, Graco's pole guns allow you to spray a multitude of materials for air-assist applications. the rigid version functions as an extension with it's 1m length while the flexhead allows for usage in tight spaces.

Remote Switch for Pump Shut-Off

Even if you don't have an STX gun with your T-Max 6912, the ability to shut off the pump remotely can still be achieved with our remote switch kits.

Available in 2 lengths and extendable, use it with your choice of applicator. Simply connect to your hose close to the applicator and start/stop the pump when required.

GRACO'S FINE FINISH KIT FOR TEXTURE

Experience the difference with graco's Fine Finish kit. This kit transforms the round spray pattern into a controlled spray fan.

A round spray pattern is typical when spraying decorative material with a compressor and an air nozzle: it's difficult to control and not easy to get a an even finish.

Available for all applicators with air-assist functionality:

- STX Gun
- T-MAX Lance
- FreeFlo[™] Inline Gun
- Rigid and Flexhead Pole Guns

TexSpray T-Max Accessories

Get the most out of your equipment by using our professional accessories:
